Dedication

To the Spirit of Agriculture, which has been predominant throughout the year and has visibly affected the life and activities of the school.

The future of farming, we believe is a faith born not of words but of deeds—achievements won by the present and past generations of farmers; in the promise of better days through better ways, even as the better things we now enjoy have come up to us from the struggles of former years.

We believe that to live and work on a good farm is pleasant as well as challenging; for we know the joys and discomforts of farm life and hold an inborn fondness for those associations.

We believe that rural America can and will hold true to the best traditions in our national life and that we can exert an influence in our homes and communities which will stand solid for our part in that inspiring task.

And so the class of 1953 proudly dedicates this edition of "The Harmonizer" to Agriculture and The Future Farmers of America.
